

Wholesale Deal Process

Standard Operating Procedure (SOP) & Training Guide

A complete, start-to-finish walkthrough of how we take a property from lead to paid — illustrated with a real deal: **3403 Tidewater Dr, Houston, TX.**

What We Do (Read This First)

We are **real estate wholesalers**. We do **not** buy, renovate, or rent properties. We find discounted/distressed properties, put them under contract at a low price, and then **assign that contract** to a cash buyer (a landlord or flipper) for a fee. The buyer closes and pays us. We rarely use our own money.

Our goal per deal: a \$3,000–\$5,000 assignment fee (sometimes more). Small, fast, repeatable.

The golden rule: a deal only works if we contract the property low enough that a cash buyer still has room to profit after we take our fee. That is why ARV (After-Repair Value) and the offer math matter.

Who Does What

Role	Responsibility
VA (you)	Intake leads, log everything in HubSpot, send the first texts/emails from templates, track replies, schedule follow-ups, keep records clean.
Charles	Final pricing decisions, signs contracts, sends Proof of Funds (POF), talks numbers with sellers/buyers, approves anything sent.
The system (AI + tools)	ARV/comps research, offer math, generating offer/contract/assignment PDFs, drafting messages, updating CRM.

Key Terms (Glossary)

Term	Meaning
ARV	After-Repair Value — what the home is worth fully renovated.
MAO	Maximum Allowable Offer = $ARV \times 0.70$ – repairs – our fee.
As-Is	Sold in current condition; buyer makes no repair requests.
Assignment	Selling our contract rights to an end buyer for a fee.
EMD	Earnest Money Deposit — small good-faith deposit held by title.
POF	Proof of Funds — shows we/our buyer can pay cash (Charles handles).
REO	Bank-owned foreclosure.
Inspection / feasibility period	Days after signing to inspect and cancel for a refund — our safety net.

The 10-Stage Process

STAGE 1	LEAD IN
What happens	A property comes in — from a marketing campaign, an agent (like John Williams), or an owner reaching out.
VA action	Create a Deal in HubSpot. Record: address, agent/owner name + phone + email, list price, source.
Example	John Williams listed 3403 Tidewater (REO). Logged in HubSpot.
STAGE 2	TRIAGE — Is it even a deal?
What happens	We only pursue distressed/discounted property. We PASS on turnkey, retail-priced, auction-with-no-inspection, and HUD homes.
VA action	Flag obvious passes for Charles. If distressed/as-is/fixer/REO/motivated → keep going.
Example	Tidewater = REO, light TLC, no flood. Green light.
STAGE 3	VERIFY ARV (most important step)
What happens	We research recent SOLD comparable homes nearby to find the After-Repair Value. No offer goes out without this.
VA action	Request an ARV/comp check. Record the ARV and 2–3 comps in the Deal notes.
Example	Tidewater ARV = \$208,000 (comps: 4303 Tidewater \$250-285k; 3430 Tidewater \$185-215k).
STAGE 4	THE MATH (MAO → Offer)
What happens	$MAO = ARV \times 0.70 - \text{repairs} - \text{our fee}$. The offer is set below market so everyone has room.
VA action	Do not invent numbers. Use the calculated offer. Charles approves the final figure.
Example	$\$208k \times .70 - \$20k \text{ repairs} - \$7k \text{ fee} \approx \$125k \text{ ceiling}$. Offer made: \$138,000 (below \$159k list).
STAGE 5	REACH THE AGENT / OWNER
What happens	We text/email to confirm availability and present our cash, as-is, quick-close pitch. Charles sends POF if asked.
VA action	Send the first message from the approved template. Honor STOP/opt-out immediately. Log the reply.
Example	POF sent to the bank; asked John for price + repair notes.
STAGE 6	WRITTEN OFFER
What happens	We send a complete, filled offer document — price, as-is, short inspection period, \$1k earnest, and the "and/or assigns" clause.

VA action	Request the offer PDF. NEVER send it without Charles approval. The agent is NOT the signer — the seller is.
Example	Offer_3403_Tidewater_Purchase_Agreement.pdf — \$138k cash, 10-day inspection, assignable.

STAGE 7 UNDER CONTRACT

What happens	Seller accepts. Now WE control the property (equitable interest) — no one can go around us.
VA action	Update stage to "Contract Sent/Signed." Note the inspection deadline and closing date. Charles posts the \$1k earnest.
Example	If the bank signs at ~\$138k, Tidewater is locked. Inspection window = walk-clean safety net.

STAGE 8 DISPO — Find the Cash Buyer

What happens	We market the deal to our cash-buyer list with a Buyer Package showing the equity/returns.
VA action	Send the Buyer Package + buyer email to the cash-buyer list. Collect interested buyers + their POF.
Example	3403_Tidewater_Cash_Buyer_Package.pdf — all-in ~\$165k vs \$208k ARV = ~\$43k equity.

STAGE 9 ASSIGNMENT

What happens	The buyer signs an Assignment of Contract and agrees to our fee. They step into our shoes.
VA action	Send the assignment doc for signature. Confirm buyer earnest is posted to title.
Example	Assignment_3403_Tidewater.pdf — assigns the contract for a \$7,000 fee.

STAGE 10 CLOSE & GET PAID

What happens	The buyer closes directly with the seller at the title company. We collect our fee. We never bring closing funds.
VA action	Confirm closing date with title. After funding, mark the Deal "Closed Won" in HubSpot and file the paperwork.
Example	Buyer pays \$138k + \$7k. Paragon collects ~\$7,000 — without ever owning the home.

The Money (3403 Tidewater example)

Item	Amount
Cash we put in	\$1,000 earnest (refundable)
Our payday	~\$7,000 assignment fee
Timeline	~3–4 weeks
Our risk	Inspection window lets us walk clean if no buyer

Hard Rules — Never Break These

- **CONTRACT FIRST**, then shop it. Never give a property to a buyer/platform before we control it under contract — that is how deals get stolen.
- **ALWAYS** keep an inspection / attorney-review period. It is our escape hatch since we have little cash to close.
- **ALWAYS** include "and/or assigns" on the buyer line so we can assign.
- **NEVER** auto-send an offer. Charles approves every document before it goes out.
- The listing **AGENT** is never the signer — only the actual **SELLER** signs.
- **NEVER** invent an offer number. It must come from the ARV math.
- Honor every **STOP** / unsubscribe immediately (compliance).
- On listed (MLS) properties, do **NOT** say "no agent fees" — it sounds like cutting their commission.

When to PASS (kill the lead)

- Turnkey / move-in-ready / recently renovated (no repair spread).
- Seller wants at/near list price, or "no lowball offers."
- Listed price is at or above ARV / market value.
- HUD homes and most auctions (non-assignable, no inspection, deposit at risk).
- Vacant land priced above comparable lot values.
- Seller is underwater (owes more than it is worth).

Where Everything Lives

CRM	HubSpot — every lead is a Deal; keep notes + stage current.
Texting	Google Voice (and future SMS automation).
Documents	Offer letters, contracts, buyer packages, assignments — generated as PDFs.
Templates	Buyer email, seller email, offer, buyer/seller packages — reused for every deal.
