

Wholesale Deal Process

Standard Operating Procedure (SOP) & Training Guide

Followed step-by-step through a REAL Paragon deal:
7512 S Saint Lawrence Ave, Chicago, IL 60619

Prepared for	New Virtual Assistant (VA) onboarding
Company	Paragon Government Solutions LLC
Real deal used	7512 S Saint Lawrence Ave — a cold text that became a signed \$110,000 contract
Contact	Charles Pleasant · 888-495-6935 · charles@paragongovsolutions.net
Version	June 2026

What We Do (Read This First)

We are **real estate wholesalers**. We do **not** buy, renovate, or rent properties. We find discounted or distressed homes, put them under contract at a low price, then **assign that contract** to a cash buyer for a fee. The buyer closes and pays us. We rarely use our own money.

Goal per deal: a \$3,000–\$5,000 assignment fee. Small, fast, repeatable.

This guide is not theory. Every stage below shows what ACTUALLY happened on a real Paragon deal — 7512 S Saint Lawrence in Chicago — including a real problem we hit (a buyer rejection) and the lesson it taught. Stages are marked **DONE** (already happened) or **PENDING** (the next steps on this live deal).

Who Does What

Role	Responsibility
VA (you)	Intake leads, log everything in HubSpot, send first texts/emails from templates, track replies, schedule follow-ups, keep records clean.
Charles	Final pricing, signs contracts, sends Proof of Funds (POF), talks numbers with sellers/buyers, approves anything sent out.
The system (AI + tools)	ARV/comp research, offer math, generating offer/contract/assignment PDFs, drafting messages, updating the CRM.

Key Terms (Glossary)

Term	Meaning
ARV	After-Repair Value — what the home is worth fully renovated.
MAO	Maximum Allowable Offer = $ARV \times 0.70$ - repairs - our fee.
Assignment	Selling our contract rights to an end buyer for a fee.
EMD	Earnest Money Deposit — small good-faith deposit held by title.
POF	Proof of Funds — shows cash to close (Charles handles).
Buy-and-hold vs Flip	A landlord values a rental on its income (rent); a flipper values it on ARV. Some deals fit only one type of buyer.
Option / inspection period	Days after signing to inspect and cancel for a refund — our safety net.

The 10-Stage Process — Walked Through 7512 S Saint Lawrence

STAGE 1	LEAD IN	DONE
What happens	A property comes in from a campaign, an agent, or an owner.	
VA action	Create a Deal in HubSpot with address, contact name/phone/email, list price, and source.	
What happened	We cold-texted listing agent Jermaine McGee (Premier Midwest Realty) about 7512 S Saint Lawrence via our Chicago Google Voice campaign. He replied.	
STAGE 2	TRIAGE — Is it even a deal?	DONE
What happens	We only pursue distressed/discounted property and PASS on turnkey/retail/HUD/auction-no-inspection.	
VA action	Flag obvious passes for Charles; if as-is/fixer/REO/motivated/rental → keep going.	
What happened	7512 was remodeled in 2020 and TENANT-OCCUPIED at \$1,500/mo. Not a fixer — a rental. We kept it, but noted it would need a buy-and-hold buyer.	
STAGE 3	VERIFY ARV / VALUE	DONE
What happens	Research recent SOLD comps to find value. No offer goes out without this.	
VA action	Record the value and 2-3 comps in the Deal notes.	
What happened	ARV about \$180,000; listed about \$140,000; rent \$1,500/mo (market about \$2,164). Low taxes (\$1,582/yr).	
STAGE 4	THE MATH (and a key lesson)	DONE
What happens	MAO = ARV x 0.70 - repairs - fee. BUT a rental is valued on its income, not the 70% flip rule.	
VA action	Never invent numbers. Use the calculated figure; Charles approves.	
What happened	Flip math said ~\$99k (below the seller's \$110k) = looked like a PASS. But as a buy-and-hold RENTAL, \$110k pencils to a ~10% cap rate. LESSON: value rentals on income. We moved forward at \$110k.	
STAGE 5	NEGOTIATE / AGREE	DONE
What happens	Confirm terms with the agent/owner; cash, as-is, quick close.	
VA action	Send messages from approved templates; log every reply; honor STOP.	
What happened	Charles agreed terms with Jermaine: "\$110,000 cash works." Seller (William McGee) accepted.	
STAGE 6	WRITTEN CONTRACT	DONE
What happens	A complete, filled contract is signed — price, as-is, inspection period, and "and/or assigns" so we can assign.	

VA action	Request the document; NEVER send without Charles approval; the SELLER signs, not the agent.	
What happened	Signed the seller's Illinois Multi-Board 8.0 contract at \$110,000, plus the disclosure; inspection election (15c) initialed to keep our escape; assignment handled via a separate Assignment of Contract.	
STAGE 7	UNDER CONTRACT	DONE
What happens	Seller accepts. Now WE control the property — nobody can go around us.	
VA action	Update stage; record the option deadline and closing date; Charles posts the earnest.	
What happened	Date of Acceptance 6/16/2026. Option/inspection period through June 23; closing set July 16. \$1,000 earnest.	
STAGE 8	DISPO — Find the Cash Buyer (the real twist)	DONE
What happens	Market the deal to our cash-buyer list with a Buyer Package showing the equity/returns.	
VA action	Send the Buyer Package + buyer email; collect interested buyers + their POF.	
What happened	We submitted 7512 to MaxDispo (our builder-buyer network) — they REJECTED it: their builders need contracts at ~\$60k or less. LESSON: a turnkey RENTAL is the wrong product for builders; it must go to LANDLORD / buy-and-hold buyers. We built a buy-hold Buyer Package (assign at \$114k, ~9% cap) and began marketing to landlords.	
STAGE 9	ASSIGNMENT	PENDING
What happens	The buyer signs an Assignment of Contract, agrees to our fee, and steps into our shoes.	
VA action	Send the assignment for signature; confirm buyer earnest is posted to title.	
Next step	Lock a Chicago landlord buyer before the option deadline; assign at \$114,000 (\$4,000 fee). If no buyer in time, cancel within the option period and walk clean.	
STAGE 10	CLOSE & GET PAID	PENDING
What happens	The buyer closes directly with the seller at title. We collect our fee and never bring closing funds.	
VA action	Confirm closing with title; after funding mark the Deal "Closed Won" and file paperwork.	
Target	Buyer closes the \$110,000 purchase; Paragon collects ~\$4,000 — without ever owning the home.	

The Lesson From This Real Deal

Match the deal to the right buyer BEFORE you commit. 7512 was a great rental but the wrong product for our builder network (MaxDispo). Builders want deep-discount fixers; turnkey rentals go to landlords. Knowing the buyer type up front tells you who to line up at Stage 8 — and saves a deal from stalling.

The Money (7512 S Saint Lawrence)

Item	Amount
Cash we put in	\$1,000 earnest
Target payday	~\$4,000 assignment fee (assign \$114k on a \$110k contract)
Status	Under contract; finding a landlord buyer before the option deadline
Our safety net	Cancel in the option/inspection window if no buyer = walk clean

Hard Rules — Never Break These

- **CONTRACT FIRST**, then shop it. Never give a property to a buyer/platform before we control it under contract.
- **ALWAYS** keep an inspection / option period — our escape hatch since we have little cash to close.
- **ALWAYS** include "and/or assigns" so we can assign.
- **NEVER** auto-send an offer. Charles approves every document before it goes out.
- The listing **AGENT** is never the signer — only the actual **SELLER** signs.
- **NEVER** invent an offer number — it comes from the ARV/value math.
- Match the deal to the buyer type early (flip vs. buy-and-hold).
- Honor every **STOP** / unsubscribe immediately.

When to PASS (kill the lead)

- Turnkey/retail-priced with no repair spread (unless it is a strong rental for a landlord buyer).
- Seller wants at/near list price or "no lowball offers."
- Listed at or above ARV/market value.
- HUD homes and most auctions (non-assignable, no inspection, deposit at risk).
- Vacant land priced above comparable lot values.
- Seller is underwater (owes more than it is worth).
